

ADVANTAGES OF SAFETY SEAL +PLUS+ THE LIQUID PATCH

Compared with Patch and Patch/Plug

In addition to being less expensive, the advantages of Safety Seal +Plus+ The Liquid Patch as compared with Patch and Patch/Plus are as follows:

- 1. No mechanical grinding of today's thin inner liner. Over grinding can permanently damage a tire**
- 2. No need to use ineffective inner liner coatings that are a poor attempt to cover over damage from mechanical buffing**
- 3. Simple to use. Unlike Patch and Patch/Plugs, Safety Seal +Plus+ The Liquid Patch is a simple straight forward repair. It is easy to teach a technician how to use this product.**
- 4. The fewer steps with the Safety Seal +Plus+ The Liquid Patch reduce the chance for installer error.**
- 5. Reduces tire repair material inventory. No need to stock multiple size patches, buffing equipment and Inner Liner Coatings.**
- 6. Repairs angled injuries.**
- 7. Weather and humidity will not affect the performance of Safety Seal +Plus+ The Liquid Patch.**
- 8. Eliminates the health hazard to both eye and respiratory system from the debris resulting from mechanically buffing the inner liner.**
