# SAFETY SEAL

## Why choose Safety Seal ?

**Professional quality guaranteed** – Manufactured in the USA to the highest standards, our products ensure a reliable seal without removing the tire. **Built to last**, Safety Seal is the choice of workshops and fleets: proven reliability and a complete, ready-to-use kit for quick and safe repairs.

### Exclusive technology

- **24 plies of high-strength nylon thread** (up to 350 lb) – custom-made and chemical-resistant.
- Each thread is impregnated with an amount of rubber equal to **250% of its volume**, thanks to an exclusive formulation developed by Safety Seal.
- **Patented process** guaranteeing a uniform, durable, and reliable repair for a permanent seal. Our chemical compounds are formulated from the finest ingredients for optimal performance.

**Comfort and durability** – Superior-quality tools, designed for easy and precise plug insertion.

Replacement parts available to extend the life of the kit.

The kit is available in either a hard or soft case to suit all types of vehicles.

## A complete range for all your needs

Our product line covers all terrains and vehicles: cars, trucks, ATVs, and agricultural equipment.

Kits, refills, chemicals, and accessories – **always professional quality, built to last**.
